PERSONAL SUMMARY

To secure a position in a tech-driven organization that values innovation, continuous learning, and professional growth. Dedicated programmer skilled in ML, DL, and Python libraries. With a creative and analytical mindset, I'm eager to build scalable systems, tackle real-world challenges, and grow by collaborating with experienced professionals and adopting the latest technologies.

PERSONAL PROJECTS

Online Voting System

MySQL, Django

- Built a secure voting platform with a MySQL backend to manage voters, candidates, and results.
- Designed a responsive frontend with backend validations and an admin panel for live result visualization.

Laptop Price Predictor

Scikit-learn, Streamlit

- Developed an ML model using Scikit-learn to estimate laptop prices based on specifications like brand, RAM, and GPU.
- Visualized data insights using Seaborn and Matplotlib; deployed an interactive prediction app with Streamlit.

Plant Disease Detector

TensorFlow, Keras, Streamlit

- Built a CNN-based image classifier to detect multiple plant leaf diseases with high accuracy.
- Leveraged TensorFlow image pipelines and deployed a real-time detection interface using Streamlit.

To-Do List Web App

HTML, CSS, JavaScript

- Developed a responsive web app for managing daily tasks.
- Features include adding, completing, and deleting tasks with data persistence using browser local storage.
